Purposes of the Jesus Journey Survey

- Reveal where we and our churches are in our journey to be more like Jesus. Following Jesus is not a contractual event; it is the beginning of a journey of invitation, a life-long realization of what life can be when lived fully with God.
- Contribute to our awareness of areas in our spiritual life where we are stronger and less strong. We often grow unevenly in our spiritual journey. Periodically taking stock of where we are on this path can encourage and help us move together toward the spiritual health and growth that God's Spirit can enable.
- Discover our "growing edge," where God is inviting us toward continued growth and maturity. This opportunity to become like Jesus in new ways is not the same for every person: a new follower of Jesus may have different needs than a more mature follower.
- Create an opportunity for churches to reflect, pray, and plan together on how best to grow the spiritual health and maturity of all our people.

"For I know the plans I have for you," declares the Lord,
"plans to prosper you and not to harm you, plans to give you hope and a future."
Jeremiah 29:11 (NIV)

The Jesus Journey Survey Process

The Survey Development Process

- The Journey survey was conducted online; participation was voluntary. The survey included 6 demographics, 4 church participation indicators, 1 spiritual maturity indicator, 1 spiritual change indicator, and 63 attributes of spiritual growth organized into 4 major goals and 16 pathways.
- Survey attributes were developed through extensive prayer and reflection by an invited group of pastors, theologians, and Christian survey specialists tasked with identifying the attributes of spiritual growth evident in maturing followers of Jesus.
- Draft questions were pretested with multiple church groups in Canada and the U.S., and substantially revised after each pretest.

SURVEY RESPONSE

Survey Interpretation

To ease interpretation, data are typically reported as a percent of people who reported that a characteristic applies to them. When a 5-point scale is used, a person can indicate that this is almost never to always true for them. In this report, we summarize the data by including the percent who agree that an attribute is true all or most of the time for them. This can be interpreted as:

"In our church, X% of people say that this is always
or most of the time true for them."

Profile of My Church

Questions were asked on the survey about personal characteristics. The data reported on the following pages are for all those who responded to the survey. This is background information that will help in the interpretation of all the information in this report.

Demographics Included

- Gender
- Age distribution
- Relationship status
- Ages of children in each household
- Race and ethnic background

Engagement in the Church Community

Questions were also asked about the involvement of survey respondents in the church community. This can help in interpretation, since the level of involvement can be related to people's spiritual maturity and engagement.

- Time involved in the church
- Frequency of attending formal church gatherings
- Frequency of participating in Christian small groups
- Frequency of volunteering in the activities of the church

Church Spiritual Change Profile

A following question was asked on the survey: "Compared to where you were 2 years ago, where is your faith and trust in God today?" People reflected on this question and chose one of the following answers:

- Growing significantly
- Growing a little
- About the same
- Fading somewhat
- Fading a lot

Reporting on the Spiritual Change Levels

Of course, we hope that a high proportion of your church reports that they are growing in their faith and trust in God. You can celebrate that! But you will probably find that some people see themselves as stuck where they were, and others may feel their faith has been fading some. Knowing this can help you understand how to support the spiritual growth and maturity of your people.

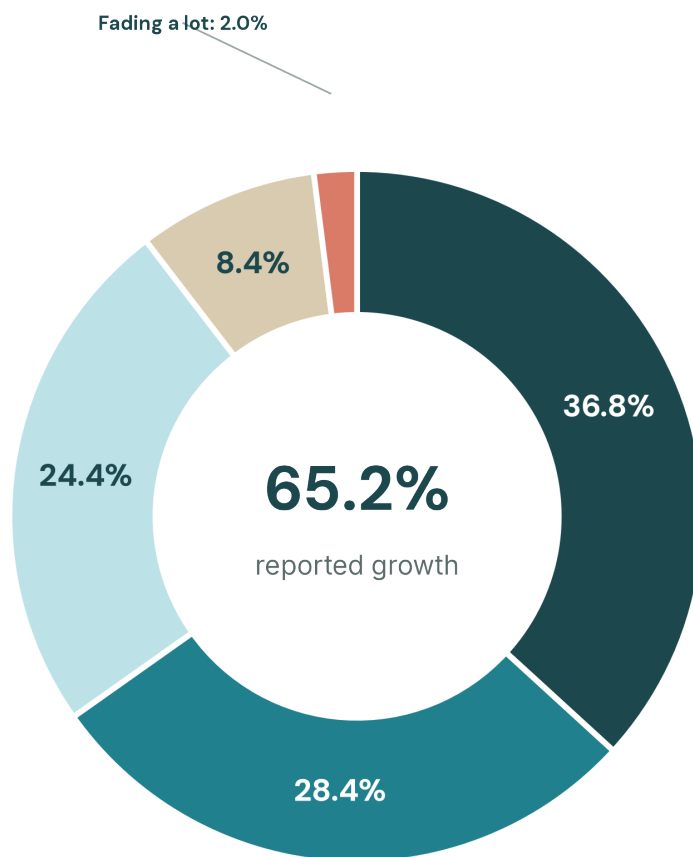

To help you, the analysis that follows gives you valuable information on the characteristics of people in your community who fall into each of the levels of self-described spiritual growth.

Levels of Spiritual Change

Jesus Journey Profile

Attributes of Movement on the Journey Toward Jesus

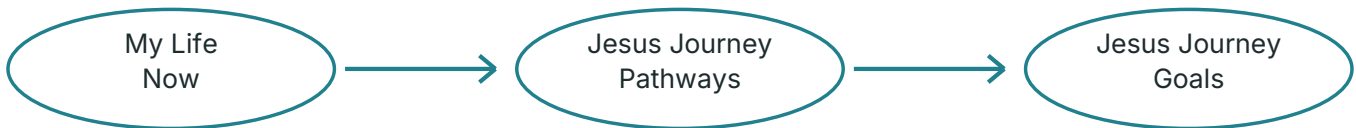

- The Jesus Journey survey asks 63 questions that delve into the life and beliefs of the person being surveyed. This is the heart of the Journey profile — less about experiences in church and more about the life one lives day by day in growing toward God and living a life guided by God's Spirit.
- Each person was asked "How true is this of you now?" followed by a series of 45 statements. Possible answers were: 1) Never or not yet true; 2) Occasionally true; 3) Quite often true; 4) Most of the time true; or 5) Always true.
- In addition, everyone was asked, "How often do you believe these to be true?", followed by a series of 18 statements, with a parallel 5-point belief scale.
- It would be unusual for anyone other than Jesus to say that each attribute is "always true" for them. We are all in process, and the statements reveal how far along we are in our Journey to be aligned with God and his purposes in our lives.
